ENHANCING TABLET RESPONSIVENESS: UPDATES TO WRITR V2024-11-08

Author(s): Louis Ouellet

In our last update to Writr, we focused on optimizing the mobile experience. This time, we're shifting our attention to enhancing the tablet experience. Here's a breakdown of what's new:

- **Optimized Tablet Layout**: We've redesigned the tablet layout to make better use of screen space. The sidebar is now fixed, allowing quick access to sidebar content and the site-tools menu at any time.
- **Improved Reading Comfort**: We've refined the typography and layout to enhance readability on tablets. The content area now spans the full screen width, creating a more immersive reading experience.
- **Classic Left Border Reintroduced**: We've restored the original left border to the content area, aligning with the theme's classic design. This small detail adds a polished touch to the overall look.
- **Streamlined Page Tools**: We've reorganized the page tools, positioning them in a consistent location with the standard view for quick and easy access.

REVAMPED MEDIA MANAGER

We've also revamped the media manager to make managing your media files easier than ever. With a more responsive design, improved readability, and enhanced usability, the media manager now takes full advantage of the screen width, making it simple to view and organize your files.

CONCLUSION

We hope these updates make your experience with Writr even more enjoyable! As always, your feedback is invaluable to us. If you have any questions, comments, or suggestions, please don't hesitate to reach out.
