How to skip the network setup during the initial setup of Windows 11

Author(s): Louis Ouellet

Setting up a new Windows 11 computer is an exciting process, but not everyone has immediate access to an internet connection. Whether you're in a remote location, having network issues, or you simply prefer to set up your computer without connecting to the internet, Microsoft has included an option within Windows 11 to bypass the network setup during the initial configuration. This can be particularly useful for users who wish to have control over their network settings or who need to install Windows 11 without being forced to update or sign in to a Microsoft account. In this guide, we'll walk you through the simple steps to skip the network setup and continue with a limited setup.

Below the chart is a blue button with the text 'Int' in white. A hand is shown clicking a circular button on the right side of the screen. The laptop is surrounded by various icons: a padlock, a gear, a cloud, a plus sign, a magnifying glass, a document, a speech bubble, a location pin, a leaf, a diamond, a star, and a square with a circle inside. The background is a light blue gradient.

How to prevent user from signing into a Microsoft Account on Windows 11

Author(s): Louis Ouellet

With the integration of Microsoft accounts into Windows 11, users have the ability to sync settings, files, and preferences across devices. However, there may be situations where an administrator needs to restrict this capability for security or policy compliance. Whether you're managing a corporate environment or you simply prefer to use local accounts, Windows 11 provides a way to disable the ability to sign in with a Microsoft account. This article guides you through the steps to configure your system and ensure that users adhere to account policies.
