TABLE OF CONTENTS

FULL WIDTH 3

02.06. CONTENT WIDTH

The width of the content area can be adjusted with the `content_width` variable in the style.ini. Since DokuWiki version 2015-08-10 “Detritus” you can do that more easily with the styling plugin over the admin interface. This is limited to px size.

FULL WIDTH

If you enable `makeFullWidth` in the template's configuration, Writr will use `content_border` as the right border of the content.
