

Comment configurer des sauvegardes sur Windows Server 2022

Auteur(s) : Louis Ouellet

Les sauvegardes sont une partie essentielle de toute stratégie de gestion de serveur. Elles permettent de récupérer des données et des configurations système en cas de perte de données ou de défaillance du système. Dans ce guide, nous allons configurer des sauvegardes sur Windows Server 2022. Cela vous permettra de créer des sauvegardes régulières des données et de l'état du système de votre serveur, qui peuvent être utilisées pour restaurer le serveur en cas de perte de données ou de défaillance du système.

Dans ce guide, nous allons configurer des sauvegardes sur Windows Server 2022. Cela vous permettra de créer des sauvegardes régulières des données et de l'état du système de votre serveur, qui peuvent être utilisées pour restaurer le serveur en cas de perte de données ou de défaillance du système.

Prérequis

• Un serveur exécutant Windows Server 2022

Last update: 2024/12/06 fr:blog:2024:12:06:how-to-setup-server-backups-on-windows-server-2022 https://laswitchtech.com/fr/blog/2024/12/06/how-to-setup-server-backups-on-windows-server-2022 11:53

- Un compte utilisateur avec des privilèges administratifs
- Un dossier partagé réseau pour stocker les sauvegardes

Étape 1 : Installer la fonctionnalité Windows Server Backup

1. Ouvrez Server Manager en cliquant sur le et en sélectionnant Server Manager.

Server Manager	APP-01 - Windowed		-	- a x

Dépannage

- 1. Si vous rencontrez des problèmes lors de la configuration, vous pouvez consulter la documentation de Windows Server Backup pour des étapes de dépannage.
- 2. Vous pouvez également vérifier le Visionneur d'événements Windows pour tout message d'erreur lié au processus de sauvegarde.

Conseils

- 1. Assurez-vous de tester régulièrement le processus de sauvegarde pour garantir que vos sauvegardes fonctionnent correctement.
- 2. Stockez vos sauvegardes dans un emplacement sécurisé pour éviter toute perte de données en cas de catastrophe.
- 3. Envisagez de mettre en place un calendrier de rotation des sauvegardes pour conserver plusieurs copies de vos sauvegardes.

Conclusion

Dans ce guide, nous avons configuré des sauvegardes sur Windows Server 2022. Cela vous permettra de créer des sauvegardes régulières des données et de l'état du système de votre serveur, qui peuvent être utilisées pour restaurer le serveur en cas de perte de données ou de défaillance du système. En suivant les étapes décrites dans ce guide, vous pouvez vous assurer que votre serveur est protégé contre la perte de données et les défaillances du système.
